

deprimo® floor level bed

Falls cost
the NHS
£15 million
per year

- Fully articulating bed
- Innovative stowable safety rails
- Dual braking castors
- 190kg maximum patient weight
- Removable head and foot boards
- 90cm (35.4") wide platform for easy transportation
- 12cm - 82cm (4.7" - 32.3") height range allowing patients to roll out of bed instead of falling
- Supplied with pressure relieving foam mattress
- Crash mats also available for extra protection
- BS EN 60601-2-52-2010 compliant

Stowable safety rails concealed
within the mattress platform

The deprimo floor level bed has been developed to significantly reduce the risk of injury to vulnerable patients who are prone to falling out of bed, increasing patient safety and reducing the costs of in-hospital injury.

12cm - 82cm (4.7" - 32.3") height range

Fully articulating bed

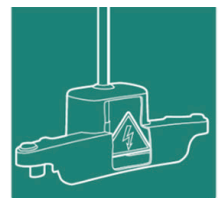

Trendelenburg/
Reverse Trendelenburg

Crash mats available for additional safety

The average hospital stay for patients who fall is 12.3 days longer

features	benefits
90cm (35.4") wide platform	Easy transportation
12cm (4.7") – 82cm (32.3") height range	Low height reduces the risk of injury to patients who are prone to falling out of bed
